Operating Instructions
For CABLEVISION
Remote Control

UR2-CBL-CV04

Introduction
The remote control is designed to operate the Scientific-Atlanta® Explorer 8000, Pioneer Voyager DVR and the Pace Micro DVR Series set top boxes and the majority of TV's on the market.

Replacing Batteries
Before you program or operate the remote control, you must install two AA alkaline batteries.

Button Functions
1. Device Default: Scientific-Atlanta® Explorer 8000
2. Volume Default: TV volume and mute through the TV, with the option of controlling volume and mute through the Cable. Refer to Section D for programming the volume and mute through your Cable.

Operations

Default State:

1. Press the TV button and the SEL button simultaneously for 3 seconds. The iO button will turn on indicating the unit is ready to be programmed.

2. Turn on the TV you wish to program.

The remote control can be programmed by pressing in a three digit code number that corresponds to particular manufacturers and brands of TV. The three-digit code numbers are listed in the code table of the instruction manual.

1. Press the TV button and the SEL button simultaneously for 3 seconds. The iO button will blink twice to confirm that the code has been stored.

Tip: If there is more than one three-digit number listed for your brand, try one code number at a time until your TV turns off.

Note: Try all the functions on the remote control. If any of the functions do not work as they should, repeat from Step 2 using the next three-digit code number from the same brand list.

B. Auto Search Method.
If the three-digit code numbers assigned to your brand do not turn off your TV or the code table does not list your brand, you can use the Auto Search Method to find the correct three-digit code number for your TV by the following steps:

1. Press the TV button and the [SEL] button one step at a time or keep it pressed. The remote will emit a series of Power ON/OFF commands. Release the [CH] button as soon as the TV turns off.

2. Press the [TV] button to store the code. The iO button will blink twice to confirm that the code has been stored.

Tip: You can verify that you selected the correct code by pressing the [MUTE] button. The TV should turn on or turn off.

C. To Find the Three Digit Code Number That was Stored in the TV.

1. Press the TV button and the SEL button simultaneously for 3 seconds.
**Tip:** The iO button will light on for 20 seconds. The next step must be entered while the iO button is on.

**Example:** One blink, three blinks and eight blinks with an interval of 1 second of iO button being turned off. The iO button will blink number of times indicating the number of the digit code.

**Note:** Ten blinks is equal to the number 0.

---

### D. Program the Volume Controls.

By following the steps below, the user can program the volume controls (Volume UP, Volume Down and MUTE). The default volume control settings on the remote control is TV volume control. If you wish you can control the volume via your CABLE box, use the following steps.

**Step 1:** Press the [CBL] button and the [SEL] button simultaneously for 3 seconds. The iO button will turn on.

**Step 2:** The iO button will light on for 20 seconds. The next step must be entered while the iO button is on.

**Step 3:** Press the [VOL +] button.

**Step 4:** Press the [CBL] button. The iO button will blink twice to indicate the programming.

To return to original state:
If you wish you can control the volume via your TV, repeat the above steps by pressing [TV] in **Step 4**.

---

### E. Low Battery Warning.

When the battery is low (2V-2.3V) and needs to be replaced with fresh batteries, the iO button will blink whenever a [DEVICE] button is pressed to turn on equipment.

---

### F. Memory Lock System.

This remote control is designed to retain programmed memory for 10 years even after batteries are removed from the remote control.

---

### G. Write your TV Set-up codes:

Set-up Code Number: [] [] [] []
