The PowerGATE™ Power Input Panel is a safe, convenient and economical means of connecting emergency generator power to a building in conjunction with a transfer switch.

### Power Input Panel

#### 400 Amp, 120/208 VAC or 277/480 VAC

- The PowerGATE Power Input Panel is a safe, convenient and economical means of connecting emergency generator power to a building, in conjunction with a transfer switch.

- Cables with 16 Series Cam-type Connectors can connect directly to the inputs, saving crucial time in emergency situations.

- Cables drape downward for lowest profile against wall.

- Tamper proof design limits access to connected cables.

- Weatherproof construction for installation on building exterior, ensures long life.

- Dead front panel covers all exposed electrical parts for added safety.

- Padlock hasp prevents unauthorized entry.

- Individual cable holes restrict access reducing theft.

Lex Products’ PowerHOUSE™ Portable Power Distribution Boxes utilize proprietary heavy duty molded rubber enclosures for shock and impact resistance, full insulation, corrosion and weather resistance for years of trouble-free service. Lex Products offers options that are fail safe, longer lasting and easier to set up.

**100–400 Amp 3 Phase Adjustable Main Circuit Breaker Boxes**

- Breakers are adjustable from 160-400 Amp and 100 -250 Amp, reducing the number of inventory items needed.
- Can protect a variety of cable sizes.
- Breaker is electronic with no thermal element. Unit will not trip due to ambient temperature.
- Extremely compact for convenient portability.
- 20 A circuit breaker protected 125 VAC duplex convenience receptacle to power your choice of devices
- Heavy duty molded rubber enclosure is fully insulated, resistant to shock, impact, corrosion and weather.
