

DM[®] 3.0

The digital standard
for every room.

NEW 3-SERIES[®] DMPS MODELS

DM continues to evolve, innovation after innovation. DM 3.0, the latest generation of DM, includes the DMPS3-200-C and DMPS3-300-C all-in-one presentation systems. With a powerful built-in 3-Series Control System[®], these all-new network-grade appliances deliver unprecedented performance and convenience.

Faster processing, no programming

Like all DM 3.0 products, the DMPS3-200-C and DMPS3-300-C make installation and commissioning easier than ever. How easy? Thanks to its built-in Crestron .AV Framework™ technology, you can get a complete presentation system up and running with no custom programming. Simply select your display drivers right from the optional pre-loaded TSW-752 touch screen, or from an iPad® or computer. Answer a few simple questions; select your display, sources, icons, and text labels. You're good to go.

Want to add wireless BYOD presentation capability? Just plug in a Crestron AirMedia™ device (AM-100) to the HDMI® port. The user interface dynamically changes and the display control is dynamically configured. Additionally, with .AV Framework, DM 3.0 systems are immediately ready to report to Crestron Fusion® enterprise management software. Right out of the box, you can control any Crestron Connected® projector or display with support for HDMI® CEC, as well as many popular displays via RS-232.

Name your sources and choose icons and labels

The user interface dynamically changes

The beauty of all-in-one

DMPS provides everything you need to deliver the highest performing HD presentation experience possible. Integrating the control system, multimedia matrix switcher, mic mixer, audio DSP, amplifier, and DigitalMedia™ distribution center all into a single 3-space rackmount package, DMPS delivers substantial signal routing flexibility and high-performance signal processing without the need for separate components. DMPS enables you to control many popular displays and projectors—simply choose from the list on the touch screen. DMPS delivers bit-for-bit, zero latency HD video switching and display, including HDCP protected content.

DMPS3

BUILT FOR THE ENTERPRISE

Built for the enterprise

DMPS3-200-C and DMPS3-300-C deliver all the advanced features of the category-leading DMPS series, and then up the ante with a powerful Crestron 3-Series Control System.

IP technology is the heart of the 3-Series Control System, so its networking abilities are second to none. High-speed Ethernet connectivity enables integration with IP-controllable devices and allows the DMPS3-200-C and DMPS3-300-C to be part of a larger managed control network.

Designed to reside on enterprise networks, DMPS3-200-C and DMPS3-300-C provide secure, reliable interconnectivity with IP-enabled touch screens, computers, mobile devices, video displays, media servers, security systems, lighting, HVAC, and other equipment—whether on the premises or across the globe.

With Crestron 3-Series you get:

- › More processing power, speed, and memory
- › True enterprise security through Active Directory
- › Support for 802.1x authentication technology—the same data security protocol used by government and financial institutions
- › Built-in BACnet/IP support—enables seamless integration with existing building management
- › Support for SIMPL# enables C# programmers to easily develop AV applications

Now hear this

DMPS is also designed to meet all your audio distribution needs. In addition to audio mixing, it provides full breakaway audio routing and surround sound pass-through. Most models include an integrated stereo power amplifier.

Even more 3-Series benefits

Designed for enhanced scalability, 3-Series affords high-speed, real-time multi-tasking to seamlessly run up to ten programs simultaneously. That means it's easy to extend the functionality of the built-in program without having to manage its code. For example, program an occupancy sensor to close the shades when the room is vacant. Of course the built-in program can be replaced with your own fully custom solution whenever needed. Last, but not least, DMPS3-200-C and DMPS3-300-C offer dramatically reduced compile time—what took 5 minutes with 2-Series now takes a mere 20 seconds!

Complete family of all-in-one DMPS solutions

DMPS is engineered to meet the functional and budgetary requirements of any room.

Model	Matrix switching	Built-in control system	Best suited for:
DMPS3-4K-150-C	10X1	3-Series	Huddle rooms and single-display environments
DMPS3-200-C	6X2	3-Series	Dual display applications
DMPS3-300-C	7X4	3-Series	Larger multi-display spaces and divisible rooms
DMPS-300-C-AEC	7X4	2-Series	Video conference rooms
