

Present series

One-chip and three-chip DLP® projectors for Corporate AV

Projection for professional presentations

In today's changing work environment, productive meetings and effective teamwork are more important than ever. Increased mobility, information overload and greater connectivity all have their impact on the way we work. To meet these challenges, we have to find smarter ways to work, collaborate and hold meetings.

That's why we developed our Present series projectors, specifically designed for meeting rooms, boardrooms, collaboration suites, auditoriums, conference theaters, classrooms and houses of worship. Whether your organization is a business or an educational or governmental institution, investing in professional projection that boosts presentations and improves decision-making processes – without compromising on ergonomics – is important.

Visual collaboration made easy

Did you know that 64 percent of business leaders believe their meetings would be more effective if they were able to view information on-screen from more than one person at the same time?*

Barco brings this democracy into the meeting room by providing the tools to simplify visual collaboration.

PRESENT-P

PRESENT-C

PRESENT-M

Performance

The **Present-P** range of one-chip DLP projectors covers a wide spectrum of brightness levels, ranging from 5,000 up to 10,000 lumens.

Thanks to the large pixel space of our **Present-C** projectors, multiple participants can simultaneously present their content on screen in excellent image quality, for true teamwork.

Powered by three-chip DLP technology, the **Present-M** projector offers the pinnacle of image quality and brightness for large-screen projection in your meeting room.

Three families

Always the right brightness to present

With the Present-P series, Barco offers a large portfolio of one-chip DLP projectors that cover a wide spectrum of brightness levels, ranging from 5,000 up to 10,000 lumens. In this extensive range, you're sure to find the right projector for your boardroom, meeting room, auditorium, training room or house of worship.

SMART DESIGN

These stylish and unique button-free projectors can be set up as tabletop or ceiling devices with equal ease, and thanks to their white design, they always blend in with your meeting room's decor. What's more, the cables are integrated into the projectors' design to ensure a clutter-free setup.

OUTSTANDING PERFORMANCE

Developed for midsize and large-screen projection, the Present-P range offers high-quality images with an unmatched level of detail and contrast. The projectors also feature a variety of preset image modes that allow for flexible color management.

CLICKSHARE AND HDBASET

Supporting the integration of optional connectivity modules, the Present-P projectors are fully future-proof and can easily be upgraded with extra functionalities. Based on Barco's wireless presentation system ClickShare, the 'ClickShare Inside' option can be nicely integrated under the hood of the projector and allows users to wirelessly share their content on-screen for true collaboration. And thanks to the HDBaseT™ module, uncompressed video signals can be transmitted over a single Cat 6 cable.

USER FRIENDLY

Truly user friendly, the remote control features only one button. Via the remote you can also access an intuitive touchscreen from which you can manage the most commonly used projection settings.

LOW COST OF OWNERSHIP

The total cost of ownership for the Present-P series projectors has been reduced to a minimum thanks to their reliable DLP technology and sealed optics.

“In our meeting rooms, we want to offer only the best-quality technical equipment. Barco is a brand that is renowned as a leader in its field. When our guests see Barco projectors, they know they will get a high-quality visualization solution that they can count on from the very first to the last minute of their conference.”

Hrannar Hafsteinsson, IT manager at Hilton Reykjavik Nordica

Did you know?*

- When companies upgrade meeting spaces, their number-one priority is investing in presentation tools.
- The most important objectives for installing new AV equipment are:
 - improving meeting dynamics (47%),
 - reducing meeting setup times (41%), and
 - improving the reliability of the technology (40%).
- A whopping 92% of meeting participants work with presentation software.

Share with confidence

With the Barco Present-C range, meetings have never been more engaging and productive. Several meeting participants can simultaneously present their content on-screen in excellent image quality, making your meetings more collaborative and effective.

BETTER COLLABORATION

Sharing large data sets in multi-window applications is a breeze with our Present-C projectors. The result? Better decision-making and enhanced meeting efficiency.

IMPRESSIVE IMAGES

Featuring high resolutions and exceptional contrast ratios, the projectors deliver crystal-clear and high-contrast images with excellent brightness uniformity. And thanks to their high-brightness color wheel and all-glass lenses, they ensure razor-sharp images with vivid colors.

SEE EVERY DETAIL

Offering a large pixel space – ranging from Full HD (1,920 x 1,080) up to WQXGA (2,560 x 1,600) resolution – these projectors make sure you see every important detail at once and guarantee that presentations are clearly visible from the first to the last row in large auditoriums.

COMPACT AND SILENT

Our Present-C projectors feature a compact and lightweight design and thanks to their white color they perfectly complement the office space they're installed in. Moreover, their low noise level makes working in an environment with front projection more comfortable.

REDUCED COSTS

The ideal alternative to the traditional, complex collaboration setup with a dual channel blend or bezel, these projectors minimize installation costs. What's more, their filter-free design, DLP technology and energy-efficient dual lamp system allow you to reduce your maintenance costs significantly.

Presentations that truly inspire

Thanks to its three-chip DLP technology, the Present-M projector generates crisp images that are rich in contrast and have perfect color saturation and stability. As it makes no compromises on color and brightness, it delivers the ultimate in high-quality, large-screen projection for your enterprise.

INGENIOUS DESIGN

The ingenious design of the white Present-M projector blends in perfectly with the environment for easy integration into modern workplaces.

UNPARALLELED EASE OF USE

Via the user-friendly control menu, you have immediate access to the most common features, and the intuitive remote control makes it a breeze to operate this button-free projector. It is also simple to set up and comes with a wide range of interchangeable lenses for flexible installation.

UNMATCHED IMAGE QUALITY

Powered by three-chip DLP technology, the Present-M projector ensures excellent images with stunning colors, making it the perfect fit for applications in which large screen projection with crisp colors is key.

EXCELLENCE WELL INTO THE FUTURE

Connectivity and collaboration technology are rapidly evolving, and we've kept this in mind while designing this projector. That's why it can easily be extended with new features in the future.

MAXIMUM VALUE FOR MONEY

Thanks to its DLP technology and sealed optics, the Present-M projector guarantees impeccable images while minimizing the total cost of ownership.
