

CSF-SB-ROLLER

Crestron® Roller Shade Fabric Sample Binder

The Crestron® Roller Shade Fabric Sample Binder elegantly displays the Heritage and Designer fabric collections in a highly stylized, eye-catching binder. Once opened, the left-hand side of the binder features letter-sized Designer fabric samples divided into four color families. Each color family divider showcases an image of a Designer fabric in a current shading application. The right-hand side of the binder houses eight removable fan decks of fabric card samples from the Heritage collection. Each fan deck exhibits transparent, translucent, or blackout fabrics in a variety of colors to suit a myriad of shading needs.

This fabric sample binder makes it easy to envision a particular roller shade fabric in a room. Effortlessly sort through each collection and color family, pattern and fabric type. Information about the fabric is printed on the back of each sample card, including its fabric number, openness factor, and solar properties. The sample binder is an attractive, informative, and portable introduction to Crestron's full range of Heritage and Designer roller shade fabrics.

For more information about Crestron shades, please visit the **Shading Solutions** page.
