Sound-Craft Systems' Presenter and Camberlin Series of Lecterns are as functional as they are attractive. Constructed of MDF and plywood, all joints are glued and then secured with wood screws rather than staples or T-nails. Work surface and shelves are covered in Nevamar laminate with ARP coating for the most scratch-resistant laminate surface available. Removable reading surface, front access panel, and doors allow quick, easy access to components and cabling.

Standard sizes include 36", 48", or 60" widths, with 31" depth.

Ten standard wood veneer finishes, a full range of plastic laminates from Nevamar, Wilsonart, and Formica, plus seven standard carpet colors offer a wide range of finishes from which to select, with custom matching also available.

**Dimensions**

**Size:**

3636 Presenter	36"W x 48"H x 31"D
4848 Presenter	48"W x 48"H x 31"D
