Montréal-Pierre Elliot Trudeau International
Airport Installs Peerless-AV[®] Digital Signage

CASE STUDY
February 2015

The Challenge

Montréal Airport
CASE STUDY

Since 2006, the Montréal–Pierre Elliott Trudeau International Airport, the busiest airport in Quebec, Canada, has been in the process of updating and modernizing its facilities and terminals. With the expansion of the international terminal and the addition of new restaurants, shops, and a duty-free area, the airport was looking to further enhance the space with visual elements that were both eye catching and informational.

As a new section of the airport, it was imperative for the Montréal–Trudeau to provide wayfinding signage to travelers. With flights departing to and arriving from South America and Europe, the facility also needed a way to keep travelers up-to-date on flight information and delays at customs and the security check.

Based on the new addition, the airport had a clean palette to design. The end result would have to be something large and accessible, yet spatially logical for busy areas. After consulting with its designers, the airport chose to move forward with the installation of various digital signage displays and video walls throughout the terminal.

The Solution

Montréal Airport
CASE STUDY

In mid-November 2013, with the decision of digital signage displays and video walls in place, the Montréal-Trudeau turned to visual communications experts, Four Winds Interactive, and a team of integrators that they regularly worked with, Cablage Expert, to discuss logistics. Understanding the needs for this project, Cablage Expert recommended Peerless-AV® to provide the display and video wall mounts. While the Montréal-Trudeau had not previously worked with Peerless-AV, Cablage Expert praised the serviceability of Peerless-AV mounts, making them ideal for this project.

The team employed the use of Peerless-AV's SmartMount® Full Service Video Wall Mounts in both landscape (DS-VW765-LAND) and portrait (DS-VW765-POR) orientations. Offering a modular design, the Peerless-AV SmartMount Full Service Video Wall Mounts allowed the Cablage Expert team to create a variety of video wall display configurations. The Cablage Expert team also used the custom wall plate spacers to install the mounts. The spacers eliminated the need for measuring on-site, saving many hours and additional costs in installation time.

To seamlessly install multiple video displays, Cablage Expert relied on the tool-less adjustability of the mounts – a top feature for the team. After installation was complete, the team was also able to quickly access the back of the displays and service the mounts.

The Installation

Montréal Airport
CASE STUDY

Utilizing Peerless-AV's DS-VW765-LAND mounts, Cablage Expert installed a 4x3 video wall comprised of 55" landscape displays opposite the duty-free area of the international terminal. The 4x3 video wall showcases general information about the airport. Cablage Expert also used Peerless-AV's DS-VW765-POR mounts for an 11x2 video wall, a 2x2 video wall, and a tripod digital signage display.

Located in the general admission area of the Montréal-Trudeau, the 11x2 video wall of 55" displays provides travelers with information on arriving and departing flights as well as details on delays at the security checkpoint at customs. The 2x2 video wall, which is also located in the general admission area, near the food court, shares a map of the airport. The 75" tripod of displays offers travelers an interactive wayfinding tool.

The Peerless-AV Full Service Video Wall Mounts enabled the team at Cablage Expert to seamlessly blend displays straight with the wall in high traffic areas.

One of the main reasons we enjoy working with Peerless-AV® is the ease in serviceability for all of their mounts. We have worked with other vendors, but the accessibility we are provided in using Peerless-AV mounts cannot be beat

Eric Gariepy, VP of Operations, Cablage Expert

The Results

Montréal Airport
CASE STUDY

In place for over a year, the Montréal–Pierre Elliott Trudeau International Airport is very pleased with the results of its new digital signage and video wall displays. According to the airport director, when the signage lights up at night, your attention goes directly to the screen – it's eye catching. With the success of the project, the Montréal–Trudeau plans to use the digital signage for advertising. They are also considering the installation of additional video walls and tripods.

About Peerless-AV®

Montréal Airport
CASE STUDY

For over 75 years, passion and innovation continue to drive Peerless-AV® forward. We proudly design and manufacture the highest quality products, ranging from outdoor displays to complete kiosk solutions, digital signage mounts to wireless systems. Whether a full-scale global deployment or custom project, Peerless-AV develops meaningful relationships and delivers world-class service. In partnership with Peerless-AV, you are trusting an award-winning team of experts who will support your business every step of the way. For more information, visit peerless-av.com.
